Research papers 1-177

E B Davies

13 February 2012

18. Some contraction semigroups in quantum probability. Z. Wahrscheinlichkeits-
thor 23 (1972) 261-273.
35. The use of master equations in quantum mechanics. IASPS Conference Pro-

55. Uniqueness of the standard form of the generator of a quantum dynamical

94. A generation theorem for operators commuting with group actions. Math

100. The asymptotic distribution and lower bounds to the spectrum for some singular elliptic operators. CIRM Colloquium, Luminy 1984, eds. B. Helffer and D. Robert, Publ. de l’Universite de Nantes, 1985, 37-42.

129. With B. Simon: Spectral properties of the Neumann Laplacian of Horns.

165. The computation of thresholds for Schrödinger operators. LMS J. Comput.
